

**Department of Nephrology**

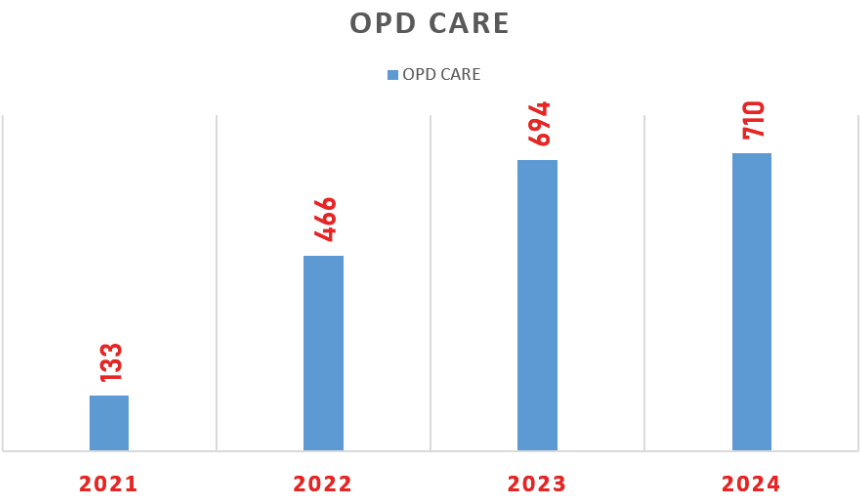

# Introduction to the Nephrology Department at Preethi Hospitals

Nephrology Department at Preethi Hospitals, dedicated to providing comprehensive, state-of-the-art care for patients with kidney-related conditions. Our team of highly skilled nephrologist, nurses, and support staff is committed to delivering exceptional treatment and support for those dealing with chronic kidney disease, end-stage renal failure, and other renal issues.

## OPD (Outpatient Department) Care

Our OPD services are designed to provide accessible and efficient care for patients with kidney-related conditions. We offer:

- **Routine Consultations:** For monitoring kidney disease, managing symptoms, and adjusting treatment plans.
- **Diagnostic Services:** On-site lab tests and imaging to facilitate prompt diagnosis and treatment.
- **Follow-Up Appointments:** Regular visits to track progress and make necessary adjustments to treatment plans.
- **Patient Education:** Resources and counselling to help patients understand their condition and manage their health effectively.

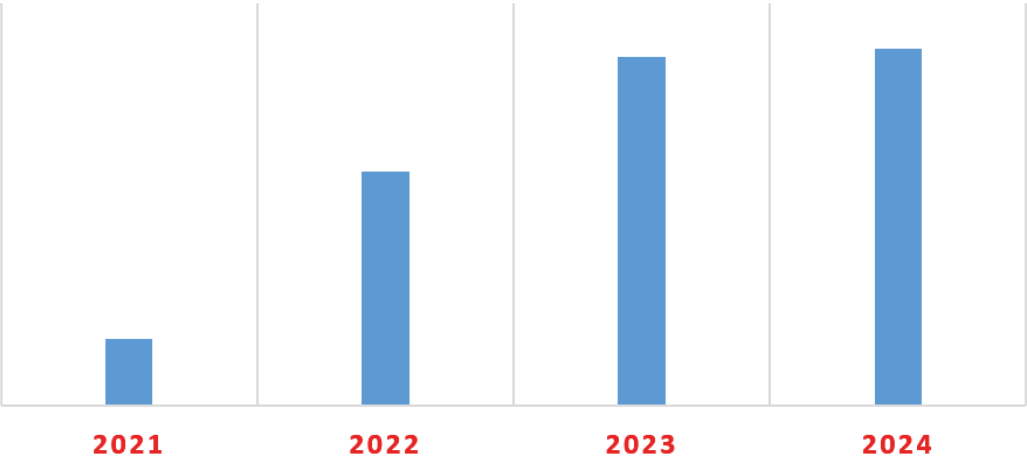

# In-Patient Facilities

For patients requiring more intensive care, our inpatient facilities provide:

- **Comprehensive Monitoring and Management:** Continuous care for patients with severe kidney issues or those undergoing major procedures like renal transplantation.
- **Comfortable Accommodations:** Private and semi-private rooms designed to ensure patient comfort and privacy.
- **Multidisciplinary Care Team:** Collaboration among nephrologists, surgeons, nurses, and other specialists to deliver coordinated care.
- **24/7 Support:** Around-the-clock care to address any medical needs and provide emergency support if required.

## Haemodialysis

Haemodialysis is a cornerstone of our nephrology care services, designed to replace the function of the kidneys when they are no longer able to adequately filter blood. At Preethi Hospitals, our haemodialysis unit is equipped with the latest technology to ensure the highest standards of care. We offer:

- **Advanced Dialysis Machines:** Our equipment is state-of-the-art, ensuring efficiency and patient safety.
- **Individualized Care Plans:** Each patient's treatment is tailored to their specific needs, including the frequency and duration of dialysis sessions.
- **Comfortable Environment:** We strive to make the dialysis experience as comfortable and stress-free as possible with a soothing environment and supportive staff.

## Renal Transplantation

Renal transplantation is a life-changing procedure that offers a new lease on life for patients with end-stage kidney disease. At Preethi Hospitals, our renal transplantation program is designed to provide comprehensive care throughout the entire process, from evaluation to post-transplant management. Our services include:

- **Pre-Transplant Evaluation:** We conduct thorough assessments to determine eligibility for transplantation and to match patients with suitable donors.
- **Surgical Expertise:** Our team of skilled surgeons performs kidney transplants with precision, employing advanced techniques to enhance outcomes.
- **Post-Transplant Care:** We provide ongoing support and monitoring to ensure the success of the transplant and to manage any potential complications. This includes personalized medication regimens and regular follow-up appointments.
- **Support Services:** We offer counselling and educational resources to help patients and their families navigate the challenges associated with renal transplantation.
